BACKEND DEVELOPER / DATA SCIENCE STUDENT - building intelligent infrastructure, data pipelines, and production-grade systems

Results-driven Backend Developer and Data Science student with hands-on experience architecting REST APIs, full-stack platforms, and AI-integrated applications on production infrastructure. Proven delivery of secure, Dockerized systems with AWS integration and large-scale data pipelines (10M+ records).

Proficient in Python, Java/Spring Boot, Go, PostgreSQL, MySQL, React, Next.js, Flask, FastAPI, Docker, Nginx, AWS S3, Pandas, Scikit-learn, LightGBM, and LLM/RAG integrations. Currently Software Engineer at Ad Venture Studio and Founding Engineer at Bravestep.

PROFILE SUMMARY

- Backend and full-stack engineer specializing in API design, RBAC/JWT security, and cloud-ready deployments.
- Shipped production systems for education, healthcare, e-commerce, and real-estate intelligence.
- Strong data engineering: large-scale ingestion, cleaning pipelines, forecasting, and analytics dashboards.
- DevOps: Docker, Nginx, VPS, SSL, CI/CD; live production showcase at dev-domainsservershowcase.vercel.app.
- Integrates LLM/RAG and ML models into products with measurable impact; Software Engineer at Ad Venture Studio.

CORE COMPETENCIES

- Backend: Python, Java, Spring Boot, Flask, FastAPI, Go
- Frontend: React, Next.js, JavaScript
- Data: Pandas, NumPy, Scikit-learn, Plotly, Streamlit
- DB: PostgreSQL, MySQL, SQL optimization
- AI/ML: LightGBM, RAG, Gemini, Ollama
- DevOps: Docker, Nginx, AWS S3, Git

PROFESSIONAL EXPERIENCE

Ad Venture Studio, Vietnam

Software Engineer (2026 - Present)

- Building and shipping mobile apps for App Store and Google Play with ASO-ready release workflows.
- Partnering with design and monetization leads on UX, performance, and retention-oriented engineering.
- Maintaining infrastructure, monitoring, and production bugfixes for studio apps.

Bravestep

Founding Engineer (Present)

- Founding engineering role focused on systems direction and product infrastructure.

Independent Engineering & Portfolio Projects, Ho Chi Minh City, Vietnam

Backend / Full Stack Developer (2024 - Present)

- Rental Property AI: 10M+ listings, demand forecasting (Python, Flask, Scikit-learn, Next.js).
- Ultimate ByteMe real-estate intelligence: LightGBM, RAG, Next.js, Flask for Synergia Conference 2026.
- Production deployments: Docker, Nginx, VPS, SSL-live showcase on real infrastructure.
- DataCleanr, Kamisori e-commerce, Name Card WordPress plugin (NFC, analytics).

Saigon Business School (SBS), Ho Chi Minh City, Vietnam

Full Stack Developer - Academic Platform (2025 - Present)

- SBS Student Serving System: Spring Boot 3, React 18, JWT, RBAC, Docker, AWS S3.
- Scholarship Announcement Web (Django) for funding discovery and management.

Healthcare & Research Engineering Projects

Full Stack Developer (2024 - 2026)

- DentalBridge: Gemini 1.5 Pro patient-friendly clinical communication (FastAPI, Next.js).
- Dental Blinding & Age Estimation: OPG analysis with AlQahtani/Demirjian methods (Flask, PostgreSQL).

Analytics & Hackathon Projects

Data Engineer (2025)

- MoMo Service Analytics: Plotly Dash for performance and demographic trends.
- Kaggle analytics showcase (Streamlit): EDA, visualization, predictive modeling.

EDUCATION

SAIGON BUSINESS SCHOOL, Ho Chi Minh City, Vietnam (Expected 2027)

Bachelor of Data Science

UNIVERSITY OF COMPUTER STUDIES, YANGON (2022 - 2024)

BSc Software Engineering
